

# Construction of sampling plans using intervened random effect Poisson distribution\*

R. RADHAKRISHNAN<sup>†</sup> AND J. SEKKIZHAR<sup>‡</sup>

## Abstract

In this paper, a procedure for the construction of sampling plan indexed through maximum allowable proportion defective (MAPD) and maximum allowable average outgoing quality (MAAOQ) using an intervened random effect Poisson distribution (IRPD) is given. Tables are constructed for the selection of the plan and these plans are compared with the sampling plans constructed using the conventional Poisson distribution.
